Everything In Life Is Vibration, Emitting Frequencies.

One hundred years ago, a global shift away from natural remedies dramatically changed the health and wellness industry. Many health disciplines were marginalized such as chiropractic, naturopathy, homeopathy, holistic medicine, herbal medicine, energy medicine and the use of natural frequencies.

A resurgence to reincorporate natural supports for human health and wellness has caught the attention

of doctors and those seeking new ways to help their body. In 2009, a small team of researchers led by Sean Martinez, discovered how to harness the benefits of natural frequencies for easy daily use. The following year, Tuning Element was formed. Today, Tuning Element's advancements in supportive frequency technology have been recognized by doctors and scientists, while being enjoyed by over 600,000 people.

Transformative Approaches For Your Health And Wellness.

Frequencies Are All Around Us

- Our eyes see frequencies as color in the visible light spectrum.
- The sun emits our visible frequency which is a small portion of the sun's radiation.
- Our ears hear frequencies known as sound waves.
- Our sense of smell is a function of the cells in our nostrils detecting frequencies emitted by particles in the air. The brain decodes the recorded frequencies.
- The heart emits frequencies measured by EKG machines.
- The brain radiates frequencies measured by EEG machines.

At Tuning Element, we harness the power of frequency to create products that help harmonize—literally retune—your body.

Imagine Everyday Relief

In today's world, most of us are too often exposed to chemical contaminants. We endure high levels of stress, are overworked, don't always eat the way we should, and don't get enough exercise. Even one of these lifestyle infractions can take their toll on us in ways we might not have considered. As a result of these stressors, our bodies don't function optimally, our minds can get cluttered, and emotional states can overwhelm us. One or all of these factors can pave the way to lowered immunity, and susceptibility to "dis-ease."

Tuning Element necklaces, bracelets and anklets are engineered with frequencies that rejuvenate, restore, and maintain optimal mental and physical wellness. The focus of the jewelry intensifies with a wider scope of support as you wear each successive higher level of jewelry.

Planet Earth's atmosphere contains certain electromagnetic waves or frequencies called the Schumann Resonances, these frequencies support the wellbeing of life (including humans). All Tuning Element products contain a minimum of one Schumann Resonance, higher levels contain more of these Resonances.

In addition, our Tuning Element products leverage a diverse range of frequencies to enhance support for the body and achieve optimal results (refer to the details below).

Smart Hydration, Smart Living

Unlock the Benefits of Frequency-Structured Water Today

Tuning Element's specific frequency technology in Aqua Tune™ bottles structures (ionizes) the water inside and also adds beneficial frequencies to the water. Structured water provides deeper hydration that benefits your health. Enjoy better taste and feel with the Aqua Tune bottle.

World's Most Advanced Water Bottle

AQUA TUNE™ BENEFITS:

-  **Invigorating fresh-tasting water.**
-  **Increases vitamin, mineral absorption.**
-  **Revitalizes skin.**
-  **Supports oxygen absorption.**

Trust The Science, Taste The Difference

"Frequency Specific Microcurrent's cannot pass through dehydrated tissues. Some form of water ionizer greatly helps keep organic tissues properly hydrated. Normal water molecules are "clustered" together, usually 9-12 molecules in a single cluster. Ionizers break up those large clusters into single molecules of water. Then the single water molecules easily pass through the Aquaporins (water channels) of cell membranes, keeping the inside of cells hydrated. This is especially important for the Central Nervous System, which includes the Brain. Ionizers can be extremely expensive. Instead, my family uses the Aqua Tune™ water bottle from Tuning Element. It costs about 1/15th of the price of conventional choices. It is small and we carry ours with us everywhere."

Fast Meaningful Change

"I noticed how easy it was to put on and how quick everything felt like it was working right. I have PCOS, I am taking pretty strong medication. So I started to feel the tingles and everything. It was pretty awesome... I have pretty bad cramps regularly, so within probably about the first two or three hours I would start to feel the tingles everywhere when I was about to have cramps. They felt like it was needing to happen and it would just not happen, and it would just tingle instead."

Master Clip

The Master Clip is a breakthrough in around-the-clock support. The Clip's frequency set is based on frequencies featured in Tuning Element's Smart Jewelry and Relief Patch line, but was made stronger for large animals. The Master Clip sends beneficially supportive frequencies via sympathetic resonance without the need for an external power source. Once the Master Clip is placed near the problem area, the body acts as a capacitor and the embedded frequencies are amplified by the existing electricity in the body. This optimizes performance at the cellular level maximizing ATP energy production in the mitochondria, the power plant of the cell. These benefits contribute to greater focus and faster recovery.
